MORBIDITY REPORT

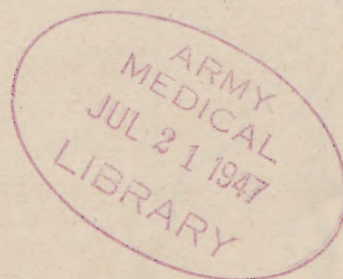

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 25 May 1946

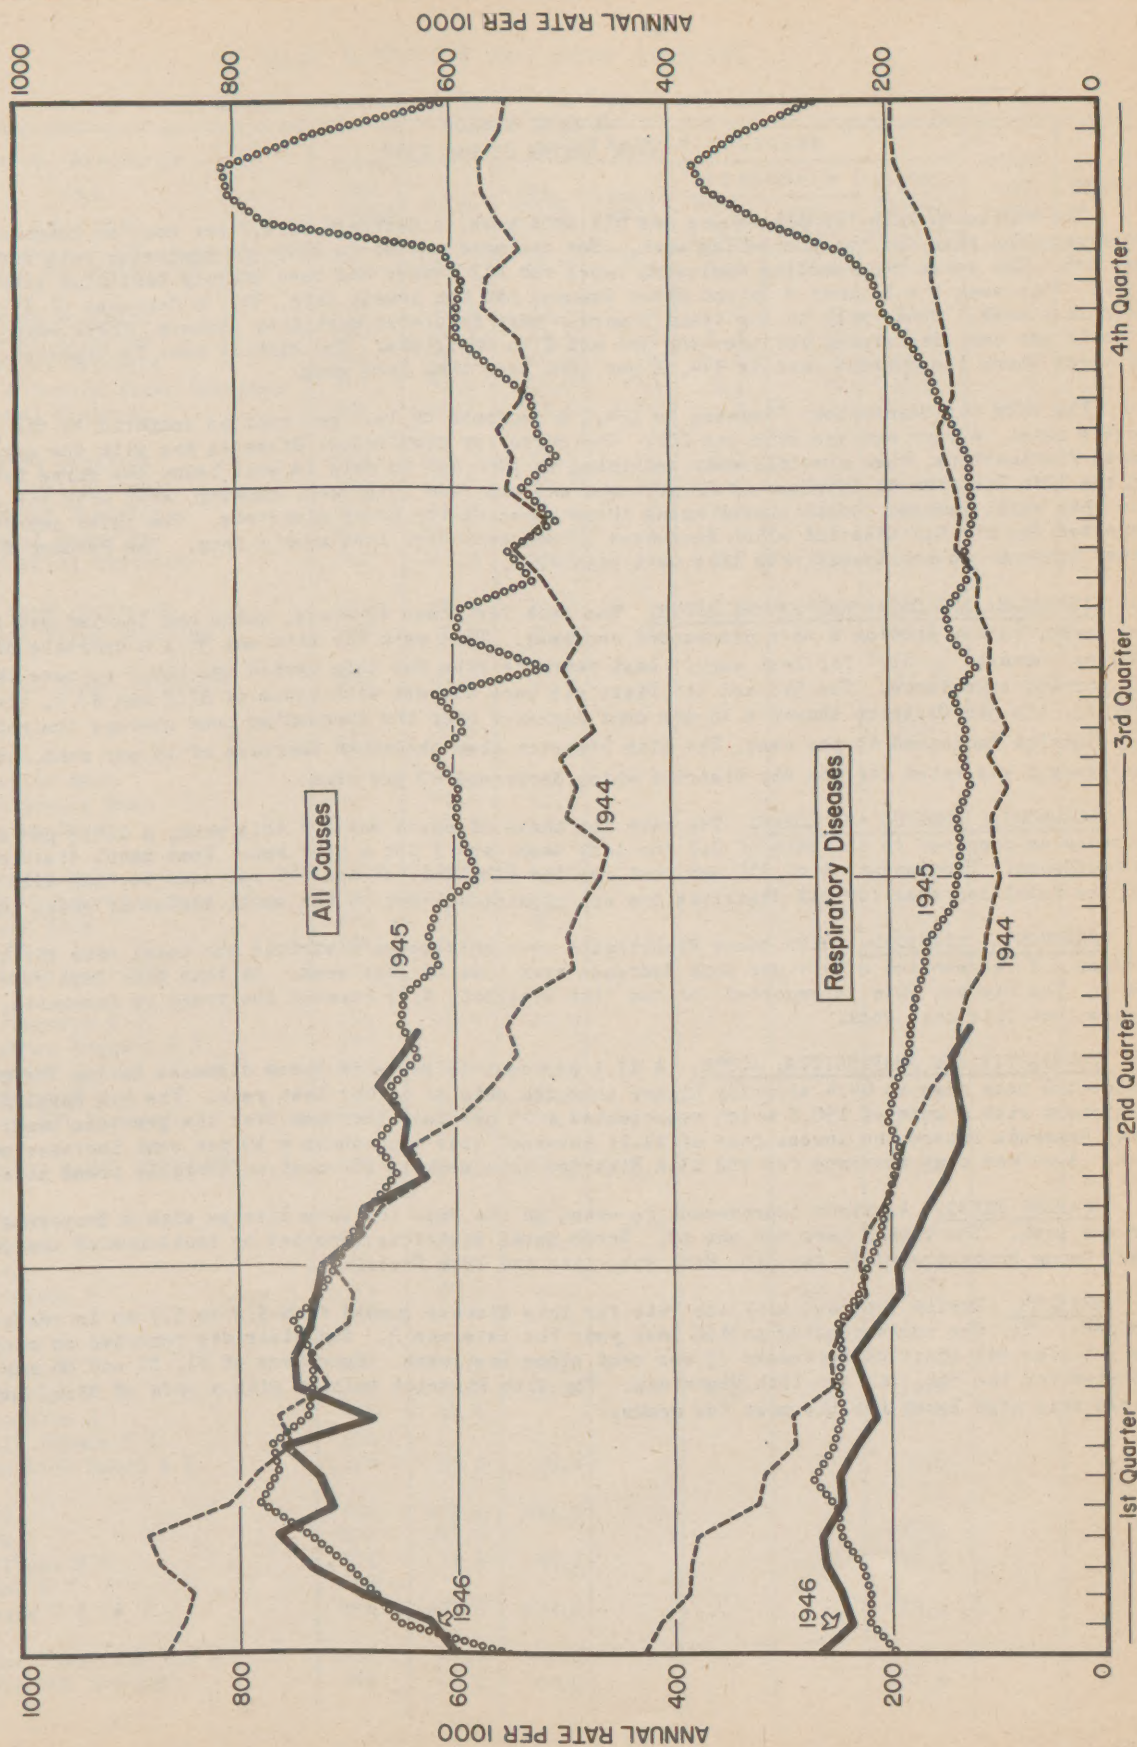

REPORT NO. 230

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

CURRENT TRENDS
Week Ending 25 May 1946

The admission rate for All Causes was 631 this week, a decrease of 3.2 per cent as compared to the corresponding rate for the preceeding week. For the same period in 1945 the admission rate for all causes was 645. The curve representing admission rates for all causes has been sharply declining since 11 May 1946. This week the Potomac & Severn River Command had the lowest rate, 307, a decrease of 35 per cent over last week. Conversely to the trend toward a more favorable morbidity picture, there were increases of 4 to 18 per cent registered for the 4th, 3rd and 11th Districts. The highest rate is reported for the 9th District where the current rate is 844, 1 per cent less than last week.

The rate for Respiratory Diseases is 124.1 a decrease of 13.4 per cent as compared to the previous week's rate. A year ago the rate was 182. The curve for respiratory diseases has with the exception of small fluctuations, been precipitously declining in 1946 and to date is well below the curve for 1945. In the 13th District an increase of 22 per cent was reported this week; however, even with the upswing the rate still remains fourth lowest among those reported for naval districts. The chief improvement was reported for the 8th District which decreased 37 per cent over last week's rate. The Potomac & Severn River Command has the lowest rate this week with 41.2.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The rate for these diseases, which had leveled out the past few weeks, is now showing a more pronounced decrease. This week the rate was 56.1 a decrease of 9.1 per cent as compared to 61.7 for last week. Last year the rate for this period was 114.2 or more than double the current experience. The 5th and 6th Districts were highest with rates of 87.5 and 83.5, respectively. However, the 5th District showed a 18 per cent decrease over the preceeding week whereas the rate for the 6th District increased 45 per cent. The 11th District also showed an increase of 15 per cent. The greatest improvement was rated for the 8th District which decreased 40 per cent.

PNEUMONIA, BRONCHO AND LOBAR. The rate for these diseases was 1.5 this week, a 114.3 per cent increase as compared to the rate of 0.7 for last week, and 3 for a year ago. Four naval districts had no incidence. The increases of 314 per cent for the 9th District and 440 per cent for the 11th District, and the total increase for all districts are not significant due to the small number of cases involved.

PNEUMONIA, ATYPICAL. With cases distributed over only seven districts the total rate for this disease 2.1 represented a 34.4 per cent decrease over that of last week. At this time last year the rate was 3. The highest rate is reported for the 11th District, 8.1; however the trend is favorable, decreasing 26 per cent this past week.

TONSILLITIS AND PHARYNGITIS, ACUTE. A 17.1 per cent decrease in these diseases during the past week brings the rate down to 64.4 slightly higher than the rate of 62 for last year. The 9th Naval District is highest with a rate of 190.8 which represented a 15 per cent increase over the previous week. The River Commands report the lowest rate of 14.1; however, that represents a 19 per cent increase over last week. A 64 per cent increase for the 13th District this week is the most unfavorable trend noted.

SCARLET FEVER. A slight improvement is noted in the rate for this disease with a drop from 7.4 to 6.1 for the week. The rate a year ago was 10. Seven naval districts reported no incidence of the disease, all cases being concentrated in the 5th, 8th, 9th, 11th and 12th Districts.

MEASLES. During the past week the rate for this disease jumped from 8.2 to 9.7 an increase of 18.3 per cent. For the corresponding period last year the rate was 2. Six districts reported no cases, and the rate for 9th District decreased 79 per cent since last week. Increases of 61, 14 and 66 per cent were reported for the 5th, 7th and 11th Districts. The 11th District is high with a rate of 48.6, and has maintained this high level for the past few weeks.
